More operational details unveiled during analyst briefing

Fuyao's auto glass segment delivered 6.9% YoY revenue growth in 1Q26. According to mgmt, this can further break down into a 3.7% decline in volume and an 11% increase in ASP. By region, domestic auto glass revenue rose by 3.2% YoY, while overseas revenue saw a significantly increase of 11.2% YoY. Regarding the aluminium trim business, Fuyao updated that the financial loss at Fuyao SAM continued to narrow in 1Q26, and the company expects to reach breakeven in 2026, even as the domestic segment lost steam due to unfavourable industry conditions.

ASP growth as a bright spot; margin remains robust

We believe Fuyao's 11.0% growth in ASP, which significantly offset the volume decline in 1Q26, can be mainly attributed to higher volume contribution from high value-added products (+7.6 ppts YoY). Fuyao reported a core margin of 20.9% in 1Q26, up by 0.5ppts YoY. According to mgmt, the margin expansion in 1Q continued to benefit from efficiency improvement (+1.0ppts), lower soda ash prices (+0.3ppts) and reduced freight costs (+0.7ppts), while lower rebate rates (-1.2ppts) and operation leverage (-0.3ppts) became drags. Despite energy price shocks in the EU and US, Fuyao estimated limited cost impact, given its natural gas is mainly secured through pipeline gas and contract prices.

US: Fire accident impact limited; ramp-up on track

A fire accident disrupted Fuyao's Ohio plant in 1Q26. Mgmt. expects operations to fully recover in early August, and will increase exports to ensure supply during this period. Mgmt. believes the actual financial impact is manageable due to relevant insurance coverage. Fuyao guides its US OPM to stay flat YoY at 13% in 2026, with the utilisation rate of its Phase II plant ramping up to 65-70%.

Trim 2026E net profit by 3.5% to reflect FX loss; maintain TP unchanged

Given the volatility of US dollar exchange rate, we derive our TP based on 2026E adjusted EPS (excl. FX impact) and 20x target P/E (unchanged) for Fuyao-A/18x (unchanged) for Fuyao-H.

Investment case, valuation and risks

Fuyao Glass (Outperform, Target Price CNY80)

Investment case

We believe Fuyao Glass Industry Group-A remains one of the best investment targets in the industry, thanks to: 1) its dominant position in China/global market (we estimate c60%/+40%+ market share in 2024), supporting it to avoid price wars and maintain reasonable bargaining power with OEMs; 2) its wide client coverage, making it insensitive to any market share loss of individual customers; 3) higher visibility on the upgrade trend towards panoramic glass and Head-up Display (HUD). We expect Fuyao Glass Industry Group-A to maintain high-single-digit growth in sales value per vehicle over the next two to three years.

Valuation methodology

We adopt a target P/E-multiple valuation methodology to value Fuyao Glass Industry Group-A given its stable earnings growth momentum.

Risks

To the upside:

1) Faster-than-expected ASP expansion pace; 2) higher-than-expected panoramic glass penetration; 3) successful overseas operations in the US.

To the downside:

1) Slower-than-expected ASP growth; 2) weaker-than-expected profit margins; 3) slowdown in the adoption of panoramic glass; 4) geopolitical tensions; and 5) a potential macro-economic recession.

Explanation of Research Ratings

Rating System

Our coverage analysts use a rating system in which they rate stocks as Outperform, Neutral, or Underperform (as defined below) relative to other companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Outperform (O/P): The stock is expected to outperform the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Neutral: The stock is expected to perform in line with the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Underperform (U/P): The stock is expected to underperform the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Under review: The rating of the stock has been placed under review after significant news. Any possible change will be confirmed as soon as possible in the form of a new broadly disseminated report.

Restricted (RS): The stock is covered by BNPP but there is no Rating and no Target Price because BNPP is involved in an equity capital market/ merger and acquisition transaction relating to the subject company.

Not Rated (NR): The stock is covered by BNPP but there is no Rating and no Target Price at this time.

Not Covered (NC): BNPP does not cover this company

As of 23 September 2024, TEB Investment has changed the recommendation rating structure for Turkish stock coverage from Buy, Hold and Reduce to Outperform, Neutral and Underperform. Ratings and target prices for dates prior to 23 September 2024 used an absolute rating structure whereby the upside or downside to target price relative to the current share price determined the recommendation. TEB Investment now uses a relative recommendation structure whereby the applied rating is based on the stock's expected performance as compared to the average total return of all companies covered by the analyst or the analyst's team in Turkish stock coverage over a 12-month investment horizon. TEB Investment research reports with ratings and target prices for dates prior to 11 August 2025 were prepared and distributed without involvement of a FINRA member firm.

ESG Rating Explanation and Methodology

ESG integration methodology: The BNP Paribas approach offers an alternative to mechanistic ESG scores and leverages the in-depth knowledge of our industry equity research teams by combining quantitative and qualitative factors. There are three steps to our framework; firstly, our teams build a materiality map to assess which ESG topics are most relevant to their respective industries. Secondly, for the chosen topics, companies are assessed relative to sector peers. The assessment can be based on metrics and qualitative judgements. Each company is given a one to five score per topic, with five being the best. Thirdly, based on the topic scores, and any other significant ESG factors, we identify companies in the sector as ESG Leaders, ESG Laggards or ESG Average. The definition of the ratings is shown below; they are not based on the average topic score as some topic scores can be more material than others.

ESG Leader: Relative to sector peers an ESG Leader is better positioned on the chosen ESG topics, or other relevant ESG considerations.

ESG Average: A company rated as ESG Average may have strong or poor performance on an individual ESG topic, but overall has an average exposure to ESG risks and opportunities.

ESG Laggard: Relative to sector peers an ESG Laggard is poorly positioned on the chosen ESG topics, or other relevant ESG considerations for the stock.

Distribution of BNP Paribas' Equity Recommendations

As at 01 March 2026 BNP Paribas covered 1275 companies. The companies that, for regulatory reasons, are not accorded a rating by BNPP are excluded from these statistics. For regulatory reasons, our ratings of Outperform, Neutral and Underperform correspond respectively to Buy, Hold and Sell; the underlying signification is, however, different as our ratings are relative to the sector.

Ratings	Stocks coverage		Investment Banking Services Within the previous 12 months	
	Counts	%*	Counts	%
Outperform (Buy)	645	51	166	26
Neutral (Hold)	428	34	101	24
Underperform (Sell)	202	16	42	21

* Please note that the percentages might not add up to 100% because of rounding.

Investing in non-U.S. securities, including the ADRs of such securities, may involve certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on non-U.S. securities. Non-U.S. companies are generally not subject to uniform audit and reporting standards, practices, and requirements comparable to those in the U.S. The securities of some non-U.S. companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a non-U.S. stock and its corresponding dividend payment for U.S. investors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.
