Sparking the Agentic Torch

I/O '26 showcased new, more efficient models, and agentic offerings across commerce, travel and daily life (Spark). Some products will leverage GOOGL's full distribution, while most will sit behind subscription paywalls (for now)...but agentic sparks are set to fly with GOOGL lighting the torch.

Agentic Sparks to Start Flying: GOOGL introduced its personal agent, known as Gemini Spark...which will roll out across the Gemini app (now 900M+ MAUs), Search, Gmail, Google Calendar, Google Drive and other GOOGL apps. In addition to GOOGL's owned and operated distribution surfaces, Gemini Spark will be integrating with 3P apps via MCP (an open standard that allows AI agents to securely connect with external apps and services), including DASH/UBER/LYFT/CART, as well as BKNG/EXPE (more on that below). Gemini Spark will be available for Google's top tier AI Ultra plan starting in Beta next week and will be available directly within Chrome later this summer.

New, Faster and More Efficient Models: GOOGL announced Gemini 3.5 Flash, a new, notably faster version of the Gemini model, with Gemini 3.5 Pro set to release next month (see [here](#) for the model release blog post and benchmark summary). GOOGL Gemini also continues to improve compute cost efficiency with **Gemini 3.5 Flash API pricing of \$1.50/\$9.00 per million input/output tokens...which is 70%/70% lower than competitors' leading models.** We see GOOGL's ability to continue building more efficient and faster models as an important driver of adoption and competitive differentiation.

GOOGL Leverages Distribution and Lower Pricing on Subscription Tiers: While many new/early agentic products from today (discussed below) are only available to subscribers in the near-term **1)** multiple new products, including Gemini Flash 3.5, Intelligent Search Box, and Universal Cart are being deployed to the full GOOGL user base (leveraging their leading distribution) and **2)** GOOGL reduced the pricing of its premium Ultra subscription tier by 20% (down to \$200/mo from \$250/mo previously) and introduced a new, intermediate tier for \$100/mo. This again speaks to GOOGL's ability to reduce inference cost and leverage its distribution to make it more difficult to compete against.

New World and Video Diffusion Models: GOOGL also released a new multi-modal world model, Gemini Omni...which is set to lead to more differentiated video creative capabilities (like Nano Banana did for image creation). With Omni, users can combine images, audio, video and text as input to generate high-quality videos grounded in Gemini's real-world knowledge. Over time we see these models driving a multitude of engagement and monetization opportunities including: video creative for enterprises/SMBs/creators/influencers/users, gaming/interactive media creation, advertising creative for more personalized, custom ads and more.

Agentic Travel is Coming: GOOGL showcased task-based agents that are coming for

lifestyle/planning agents (to build itineraries, trips and plan events). This product was particularly interesting from a travel perspective (aggregating local events, excursions, restaurants and full mapping)...setting the table for an agentic travel agent (See [Exhibit 1](#)). GOOGL even listed it as one use case in a Gemini Spark product demo (See [Exhibit 2](#)) and notably listed BKNG/EXPE as partners to come in time as agentic tools come online (see [Exhibit 3](#)). These products will only be available to GOOGL AI Ultra subscribers in Beta starting next week, so broad-based adoption is still longer-off, but the time to test and learn about the OTA's business durability (and ability to continue to win direct traffic through these new products) is coming.

Exhibit 2: ... while GOOGL also highlighted the ability for its new agent, Gemini Spark, to engage in trip planning. We will be monitoring adoption of these tools as a barometer for OTA durability.

Exhibit 3: GOOGL also outlined an opening set of app partners to be integrated with Spark over the summer, including UBER/DASH/LYFT/CART, as well as BKNG/EXPE.

Source: Google, Company data, Morgan Stanley Research

And Agentic Commerce is Too: GOOGL also showcased its agentic shopper and Universal Cart offerings that will integrate into Search, Gmail, YouTube, and Gemini. GOOGL's agents will be able to shop for items, research products, price compare, notify of price changes or availability changes, suggest items for consumers, and more...and ultimately purchase the items with user approval. GOOGL is also leveraging its leading data and distribution and UCP's (Universal Commerce Protocol) litany of partners across commerce and other verticals (including AMZN) as it lays the foundation for this product. **We now we seem closer to agentic shopping behavior entering the consumer behavior set.** Here again, information agents in search will be only be available to Google AI Pro/Ultra subscribers this summer...while early adopter behavior will be fascinating to study. We have written extensively about the agentic opportunity (see [Internet: Agentic Shoppers Are Coming... Who Could Win or Lose?](#)) and see horizontal tools like this leading to a further digitization of consumers' wallets/budgets and more durable search revenue growth.

Morgan Stanley is acting as lead financial advisor to Intersect, LLC in relation to the sale to Alphabet Inc, as announced on December 22, 2025. The deal is subject to customary closing conditions. Intersect, LLC has agreed to pay fees to Morgan Stanley for its financial services.

Alphabet Inc.

PRICE TARGET \$375.00

Our price target is determined using a discounted cash flow/discount to long-term EBITDA multiple. It implies a ~24X '27 P/E Multiple. Our DCF uses a ~8% WACC and a ~3% terminal growth rate (in line with other growth-oriented internet companies)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 19 May 2026. OVERWEIGHT THESIS

- Continued AI-driven platform-level innovation on Search, YouTube, Cloud, and with other offerings improve confidence in the durability of long term growth.
- Continued expense discipline leads to operating leverage and upward revisions on EPS and FCF estimates.

Risk Reward Themes

Secular Growth: *Positive*
New Data Era: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE

\$425.00

Implied ~15X '27 bull case EBITDA.

Faster innovation and Search/GCP acceleration lead to multiple expansion and higher earnings power. Search revenue accelerates as AI-driven innovation delivers meaningful upside to engagement. New AI offerings prove incremental to the top and bottom line and don't cannibalize core Search. YouTube and Cloud become even bigger contributors to top-line growth, and operate at a higher margin than in our base case.

BASE CASE

\$375.00

Implied ~14X '27 base case EBITDA.

Assumes pragmatic search revenue growth in '26, continued incremental platform monetization and Google Cloud acceleration in '26. As GOOGL continues platform-level innovation on Search and other categories, we assume pragmatic revenue/EBITDA growth. GOOGL introduces new AI offerings which increase confidence in the durability of long term growth and calm fears around competition. Google Cloud accelerates driven by new partnerships and growing backlog.

BEAR CASE

\$200.00

Implied ~8X '27 bear case EBITDA.

Global ad growth slows further and margins face pressure. Assumes slower search advertising growth, and that ad spending slows further. Expense discipline fails to materialize leading to lower than expected margin expansion and adj. EBITDA. New AI products create greater than expected margin pressure due to lower monetization rates and increased compute intensity.

RISKS TO PT/RATING

RISKS TO UPSIDE

- New products generate higher than expected top line contribution.
- Capital returns through greater share buybacks.
- Hiring and/or spend per headcount is lower than expected.

RISKS TO DOWNSIDE

- High exposure to SMB and travel could pressure ad revenue in a recession
- Improved disclosure around the Google and Other Alphabet segments may not decrease the overall investment activity of the business.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all

ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
